EXPERIENCE

Civil engineer **2020- now**

Maktab Hassad company

- site engineering & structural designer, monitoring, planning and overseeing construction projects ,designing different types of structures and analyzing models in different software programs.

PROJECTS

Front-end projects:

- **e-commerce** website was developed utilizing React.js and Redux to establish an online store. This implementation aims to deliver a dynamic and responsive platform that enhances the shopping experience, allowing customers to interact seamlessly.
- **Construction company website**, designed for maktab Hassad company to provide a platform to present their work and to contact with clints, made using html,css,bootstrap and JavaScript.

Back-end projects:

- **e-commerce API** developed with Node.js and MongoDB enables fast, flexible backend operations.
- **saraha app** API with Node.js and MongoDB, this app is famously known as a platform for sending messages anonymously without showing the sender identity.
